Objective:

The objective of this assignment is to create a responsive web design for **Lab Page** based on the provided Figma design. The web design should accurately implement the visual elements, layout, and interactions as outlined in the Figma design. The final result should be a user-friendly and visually appealing web page that showcases the top doctors in a specific medical field or location.

Design Requirements:

- The page should showcase top doctors, including their profiles and ratings, with interactive elements, search functionality, and optimal mobile experience. Ensure design consistency, accessibility, and basic SEO practices.
- Ensure the design is visually appealing as per the UI design.
- Use a responsive design that adapts well to different screen sizes and devices.
- Use suitable fonts, icons, and graphics that complement the design and are consistent throughout the app and website.
- Ensure the webpage has consistent design elements, but adapts appropriately for each platform.

Deliverables:

- **Github Link of Webpage:** A GitHub link of a webpage is a URL leading to the repository where the webpage's source code is stored, enabling collaboration and version control.

Submission Guidelines:

- Submit the GitHub link to your website code.
- Ensure the files are in a format that can be easily accessed and viewed by us.
- You have 48 hours to complete and submit the assignment
